

**Live Trading with Alex & Kerry**  
Dr. Alexander Elder & Kerry Lovvorn  
limited to 12 traders

**New York City - Sunday & Monday, April 29 - 30, 2018**  
With an online session a week prior and a party at Alex' home the evening before the class

Dear Trader,

In response to many requests, Alex and Kerry offer a **unique learning opportunity**, focusing on two action-packed days of live trading:

- First, get in gear with the best practices during a pre-meeting online session.
- Then come to New York City for two intensive days with Alex and Kerry.

**Only 12 SpikeTrade members** will be accepted into this unique program. Now is the time to invest in your education. Alex and Kerry will share with you their key principles as well as the latest methods and techniques. You will learn to create practical trading plans in a structured and organized way.

You'll have an intensive teaching and planning session on Sunday, and then on Monday you will watch two experts trade – ask them any questions you like.

You have an amazing opportunity to upgrade your trading – but this one-of-a-kind class is open to only 12 traders. Reserve your spot early to catch this opportunity before it disappears!

This class will help you meet **special demands** the current markets place on traders:

- Learn how to adapt to ever changing volatility
- Discover the best probabilities for trading long, short, or staying in cash
- Identify your trading style and discover what markets are best for your style
- Learn to manage trades without being married to the screen.

The markets are two-way streets – they go up and down. Professional traders buy and sell when the time is right. They also go short, making money on declines as well as rallies. Watch Alex & Kerry work their way through the markets, plan, execute and manage trades. Ask your questions and have Alex and Kerry stand by you while you trade.

You'll work on your **techniques**. Which of the thousands of stocks, futures, or currencies will you buy or sell short? How will you find the best price levels for entries? Where will you set your profit targets and protective stops? When is the best time for exits? The answers depend on your style of trading, which will be fine-tuned in this class.

**Psychology** is an essential aspect of trading success. You must develop trading discipline, and the best way to do it is by keeping good records. Alex and Kerry will share their systems with you. **Risk management** is a skill that separates winners from losers. Professionals who control risks take money away from amateurs. You will learn the rules for risk control, enabling you to manage your own account like a pro.

Take this unique opportunity to **learn from two traders how they take money out of the markets** with different styles of trading. Amazingly, both Alex and Kerry made money trading in front of the group in almost all previous workshops. While there is no guarantee that their winning streak will continue, you'll learn more in this intensive two day program than from a year of lonely slugging through the graduate school of hard knocks.
